How we work

Work closely with customers
Act swiftly for design and sampling.

Sample making

Pattern

4 proficient pattern masters can work on patterns based on given artworks/specifications, and adjust according to QA or buyer's comments.

Sample making

6 skilled sewers can make 45pcs (including 1st fit, revised, pre-production samples) per day.

Fitting

3 QA measures every ready sample and fit it on mannequins, strictly checking the fittings before sending out.

A new sample can be finished within 1 week.

Design Team

Yitu Digital Technology Co., Ltd-Shenzhen Base (China)

- A workshop of over 300 professional designers, who follow what's new and can provide most fashionable and trendy artworks.

London Base (UK):

- Freelance designers at London, who promote cads and face to face meeting with buying team monthly.

Research Team

Veggie dye Technique

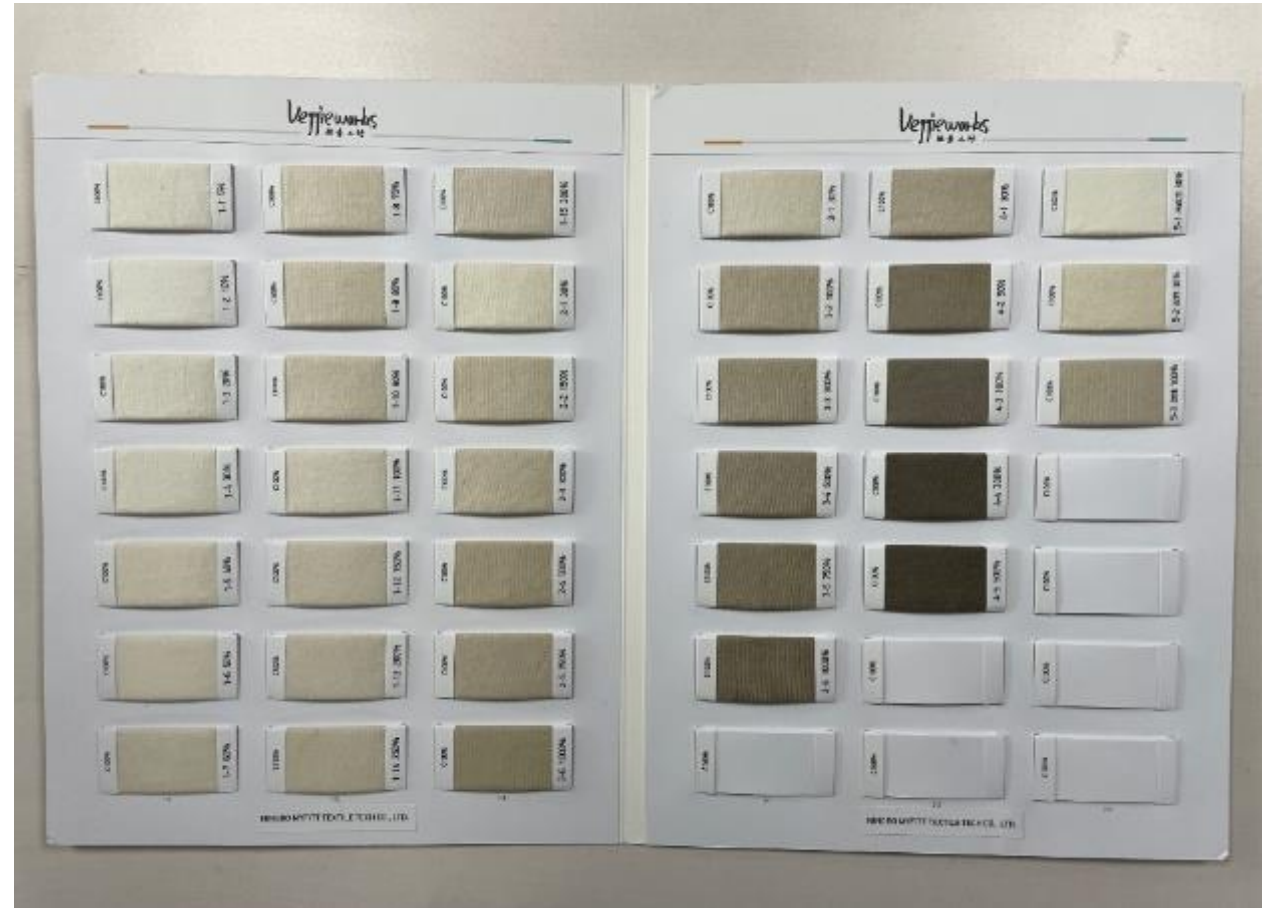

Research Team

Veggie dye colors

Compared with synthetic dyes, veggie dye derived from plants, is more health and environment-friendly.

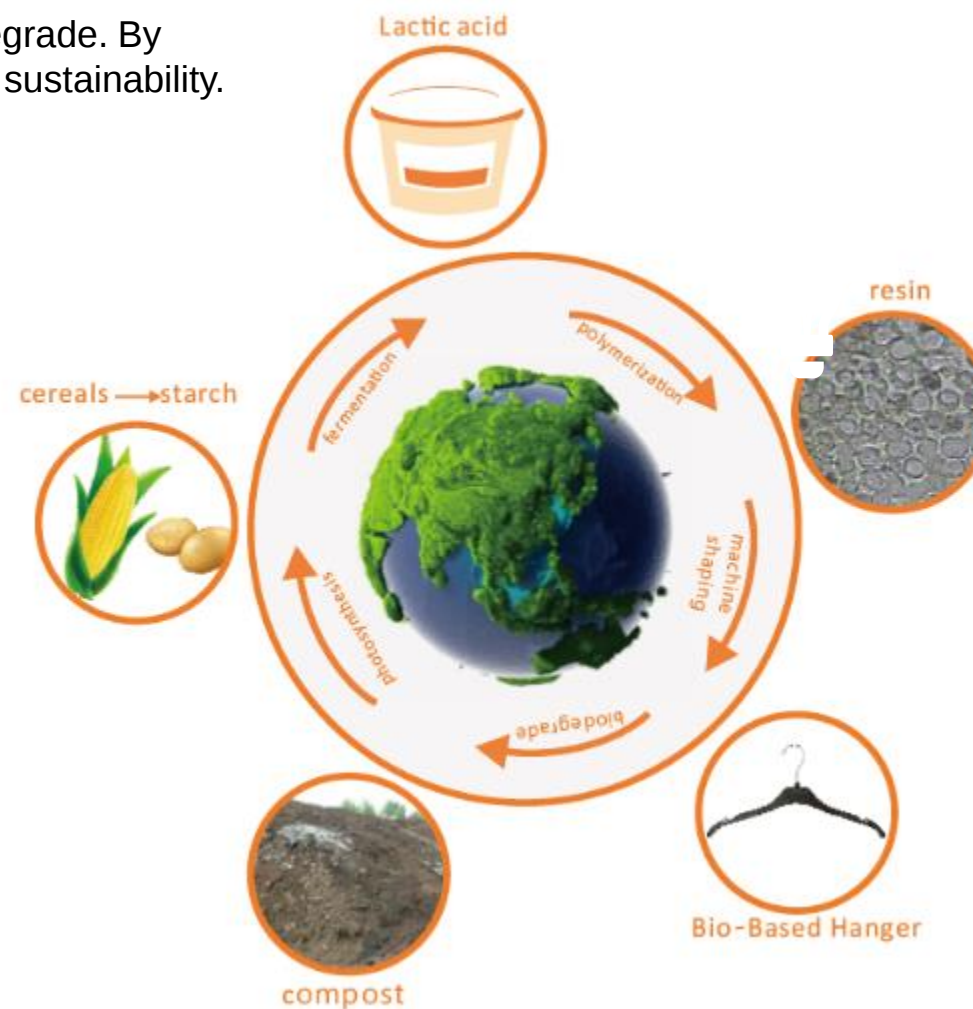

Certification:

Research Team

Bio-based hanger

Hangers made of biodegradable materials takes far more less time to degrade. By directly migrating into the soil and returning to nature, it largely promote sustainability.

Test Center

An independent engineering lab center that is designed for fibre, yarn, fabric and garment tests following CNAS and PRIMARK Accreditation.
